

Wholesale 1211A021 Engine Oil Pump For MITSUBISHI PAJERO

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 1211A021
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Product Name: Oil Pump
- Size: Standard
- Warranty: 12 Months
- Highlight: **MITSUBISHI PAJERO 1211A021 Engine Oil Pump**
, MITSUBISHI PAJERO Engine Oil Pump

Product Description

Product Description:

The oil pump plays a pivotal role within the internal combustion engine, acting as the orchestrator of lubrication. This fundamental component is tasked with the efficient circulation of engine oil, spreading it evenly across the engine's moving parts. Its main purpose is to minimize the wear and tear caused by friction.

This essential device guarantees a reliable and sufficient flow of oil, which is crucial for maintaining optimal lubrication within the engine. Moreover, the oil pump aids in cooling the engine by dissipating heat generated during operation, thus preventing potential overheating and ensuring the longevity of the engine.

Features:

Oil Pump Product Features

Efficient Oil Circulation: Our oil pump is expertly crafted to maximize the transfer of oil from the reservoir to the engine's critical parts. This guarantees a consistent flow rate, ensuring all vital components remain well-lubricated, thereby reducing friction and preventing wear and tear on important engine elements.

High-Quality Construction: Craftsmanship at its finest, our oil pump uses top-tier materials, robust cast iron, or lightweight aluminum, to endure the rigorous conditions of engine operation. These substances are resilient to extreme heat and pressure, which translates to sustained performance and dependability over time.

Precise and Reliable Operation: Engineering precision is at the core of our oil pump, featuring finely-crafted internal pieces like gears or rotors. These are meticulously produced to maintain smooth operations, securing steady oil pressure and flow, thus keeping your engine's performance at its peak.

Enhanced Lubrication and Cooling: The essential role of our oil pump is to effectively disperse oil for the lubrication and cooling of the engine's moving components. Adequate lubrication curtails friction and wear, and proper cooling dissipates excess heat, which is pivotal for the engine's longevity and operational efficiency.

Rigorous Quality Control: To assure top performance, durability, and reliability, our oil pump is subject to a stringent testing and quality assurance protocol. Aligned with industry specifications and supported by a warranty, our oil pump offers you certainty and tranquility with your investment.

Applications:

Maintain Peak Engine Health

Unlock the full potential of your engine with our superior-quality oil pump. Specifically designed to provide your vehicle with a smooth and efficient oil distribution, our pump ensures that every moving part is well-lubricated, helping to prevent wear and tear.

Enhanced Lubrication and Cooling

Our premium oil pump goes beyond simple lubrication. It is engineered to enhance the oil flow, thus ensuring consistent lubrication and effective cooling. This dual action extends the life of moving components and keeps the engine cool, even under stressful conditions.

Reliable Performance

Investing in our oil pump means placing your trust in a product that delivers reliability. Manufactured with robust materials, our pump is built to last and withstand the rigors of daily use. Drive with the confidence that comes from knowing your engine operates at its best, thanks to the high performance of our oil pump.

Remember, a small investment in our oil pump today can save you from costly repairs down the line. Choose excellence, choose our oil pump.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years

A large of stock

Professional export company

Accept small order

We can design anything well according to customers' requirment
